## Summary

Experienced Full-Stack Developer (active since 2016) and Founder/CEO (Tech Paw, 2023) with a proven track record in designing, building, and scaling robust digital solutions that drive business growth.I specialize in PHP (Laravel, WordPress) and modern JavaScript ecosystems (Vue, React, Node.js, Nuxt), with additional experience in Python and both SQL/NoSQL databases (MySQL, MongoDB). My work spans cloud-native architectures across AWS, Vercel, and Cloudflare.I have strong expertise in designing and integrating complex REST/SOAP APIs, as well as connecting and optimizing workflows across CRM platforms such as HubSpot and Microsoft Dynamics. I operate comfortably within modern development environments using Git/GitLab, Jira, and Monday.com. Over a 5-year collaboration with Isabel Group—Belgium's leading FinTech, I progressed from internal team member to trusted external consultant, contributing to high-impact, production-grade systems in a regulated environment.I actively follow and integrate modern AI-assisted (Vibe Coding) development practices to improve development speed, code quality, and decision-making processes, while maintaining a strong focus on software architecture fundamentals.Passionate about building scalable, secure systems, I lead technical projects end-to-end, working cross-functionally to deliver measurable improvements in performance, efficiency, and user experience.

## Work Experience

### Full Stack Developer & CEO at Tech Paw

Bruxelles, Belgium — 06-2023 - Current

*https://www.tech-paw.com*

Founded Tech Paw SRL in 2023 to deliver full stack development and strategic consulting services across Europe. Acting as both developer and technical advisor, independently building scalable Content Management System, Customer relationship management platforms, and web platforms tailored to client needs. Businesses advisor on infrastructure optimization, deployment automation, and cross-platform integration. Fervent believer of vibe coding, AI integrated agent and MCPs.

- Independently develop and deploy client-facing web apps using different platforms leveraging modern PHP, Javascript and Python frameworks, enhancing clients' web presence across multiple aspects including SEO, UX/UI design, performance, security, and modernization.

- Provide strategic direction on selecting optimal hosting environments based on scalability, performance, and budget.
- Facilitate clear communication with clients, stakeholders, and product owners to align development efforts with business goals.
- Collaborate with designers to ensure UI/UX guidelines are effectively implemented in the application's functionality.
- Manage project budgets efficiently to maximize return on investment and resource allocation.
- Establish and maintain rational project timelines to ensure on-time delivery and scope control.
- Design and implement interactive dashboards and charts using Chart.js, vue-chartjs, and native JavaScript and also integrating map APIs like Mapbox or Google Maps to visualize geospatial data effectively.
- Implement UI animations and transitions with Bootstrap, SVG, and Vue native functions to enhance user experience and interface fluidity.

## Full Stack Engineer at Isabel

Bruxelles, Belgium — 08-2020 - 01-2025

*https://www.isabelgroup.eu/*

Led web development projects supporting Isabel Group's digital and marketing strategies. Collaborated closely with cross-functional teams including Designers, DevOps, SecOps, and Product Owners to ensure high-performance, secure, and user-centric solutions. Independently delivered scalable websites and applications integrated with Content Management Systems, Customer Relationship Management platforms, and third-party APIs. Oversaw deployments and content-rich platforms focused on financial and accounting services, consistently aligning with stakeholder goals and industry compliance standards.

- Expert in PHP frameworks (Wordpress, Laravel), with strong proficiency in JavaScript libraries for front-end development (Vue and React as SPA).
- Skilled in designing and implementing RESTful APIs, ensuring efficient system communication and data exchange.
- Experienced in customizing CMS platforms (WordPress, Drupal), CRMs systems for enhanced functionality (Hubpost, Microsoft Dynamics) and analytics tools (google analytics and matomo).
- Proficient in SQL and NoSQL databases, including MongoDB and MySQL, enabling robust data handling and optimization.
- Proficient in tools such as Jira, Monday and Slack for efficient task and project management.
- Develop responsive UI components with animated transitions using Bootstrap, SVG, and Vue native transition

## Full Stack Developer at Higher Education Marketing

Montreal, Quebec, Canada — 10-2018 - 09-2019

*https://www.higher-education-marketing.com/*

Intermediate Full Stack Developer specialised in Content Management Systems and Customer Relationship Management platforms development, integration, and management for a company dedicated to recruiting international and local students for universities, colleges, and English language schools across Canada.

- Develop and manage websites for diverse clients, including universities, colleges, language schools, and business partners, as well as oversee the company's own website.
- Utilize platforms such as WordPress and landing pages to deliver customized, high-performance web solutions.
- Configure, manage, and integrate Customer Relationship Management platforms (HubSpot, Mautic, Campus Login, Nova) and their APIs to support effective client interaction and data management.
- Design custom themes and plugins to enhance website performance and streamline client interactions.
- Coordinate project tracking with teams and clients, establishing protocols to optimize collaboration and project outcomes.

## Full Stack Developer at Oliver's Learning (Oliver Solutions)

Toronto, Ontario, Canada — 01-2018 - 06-2018

*https://oliversolutions.com/*

Full Stack Developer responsible for the development and maintenance of a multi-site learning platform at Oliver Solutions, a premier Canadian provider of regulator-approved education and exam preparation for financial professionals.

- Maintaining and enhancing a multi-site web portal built on ExpressionEngine, ensuring consistent and seamless user experiences across multiple domains.
- Managing front-end and back-end processes for clients and administrators, improving usability and system performance.
- Developing custom plugins, modules, and add-ons using PHP, JavaScript, and MySQL, utilizing frameworks like CodeIgniter or Laravel to extend platform functionality.
- Implementing the MVC design pattern to create clean, modular, and scalable code architecture.
- Creating and optimizing front-end templates to deliver engaging and interactive user interfaces.

## Full Stack Developer at Larche Digital

Barrie, Ontario, Canada — 04-2016 - 01-2018

*https://larche.com/*

Independent Junior Web Developer for a digital agency in Barrie specializing in advertising, design, marketing, and web solutions, recognized for managing popular radio portals across Canada.

- Coordinating website timing, setup, and launches in WordPress environments across various hosting types, including shared hosting, cloud, and VPS.

- Developing custom WordPress solutions from scratch or through customization, covering themes, layouts, plugins, APIs, and database queries.
- Providing ongoing maintenance, including debugging and optimization for high-profile radio websites like 104.1 The Dock, 92.3 The Dock, Kicx 91.7, and Kicx 106.
- Implementing Google Analytics, Google Console, and social media analytics (Facebook, Twitter, Instagram) for comprehensive site tracking and SEO enhancement.
- Performing essential maintenance tasks, including migrations, backups, security enhancements, and user authentication.

### WEB DEVELOPER at ICFF

Toronto, Ontario, Canada — 09-2015 - 01-2016

*https://icff.ca/*

Web Development Apprentice at the Italian Contemporary Film Festival (ICFF) in Toronto, supporting the festival's digital presence and operations.

- Provided website maintenance and updates for key festival platforms, including the main ICFF website and the L'Altra Italia blog.
- Ensured smooth operation of front-end interfaces, making updates to improve user experience and keep content relevant for festival audiences.
