Application for: Full Stack Developer

Company: CoolCompany

Dear hiring manager,

Pleasure to meet you: my name is Marco Maffei and I'm a 45-year-old Italian Full-stack (Front-end focused) developer currently based in Brussels, Belgium.

I have been working in web development since 2016, with my most significant experience coming from 2020 to 2025 as a full-stack developer in the digital marketing department at Isabel Group, Belgium's leading fintech company.

In that role, I was responsible for the full lifecycle of multiple web applications, from initial development and coding from the ground up, through to ongoing maintenance, enhancements, and task coordination. I worked closely with webmasters, DevOps, and SecOps teams to ensure high standards of performance, security, and reliability across the applications.

The infrastructure was AWS-based and served a range of applications, but my main focus was on:

CMS-driven sites (marketing)

Node.js & javascript frameworks (SPA)

PHP applications and a Laravel projects

Jamstack/Headless solutions / REST or SOAP APIs integration

On the front-end side we used modern JavaScript frameworks (React, Vue, and more recently Next.js & Nuxt.js as full-stack framework) together with templating engines and custom solutions. I also regularly integrated diverse internal and external systems via REST/SOAP APIs to improve processes and data accessibility.

In 2025, following several organisational changes from the previous year at Isabel, our collaboration came to an end. Since then, I have been working with various clients and projects, which has given me the opportunity to deepen and broaden my expertise across different technology stacks and experiment with new tools and softwares.

From the beginning of this year, I'm looking for a stable, long-term project where I can continue to grow technically and as a human being, take on more responsibility, and contribute meaningfully to a product or team. That's why I'm particularly interested in this opportunities at CoolCompany: I believe my background, experience in corporate environments, collaborative approach, and problem-solving mindset could be a interesting match.

I would be very happy to answer any potential questions regarding my application and in the meantime, let me just thank you for your time.

Kind regards,

Marco Maffei

Full Stack Developer
