Application for: Front End Developer

Company: Footlocker

Dear hiring manager,

Pleasure to meet you: my name is Marco Maffei and I'm a 45-year-old Italian Full-stack developer (Front-end focused) currently based in Brussels, Belgium.

I have been working in web industry since 2016 for different companies and I've built my career between Canada, Italy and now Belgium. My most significant experience was gained between 2020 and 2025 as the lead developer in the digital marketing department at Isabel Group, Belgium's leading fintech company.

In that role, I was responsible for the full lifecycle of many web applications from initial concept through to ongoing maintenance, enhancements, and task coordination. I worked closely with webmasters, DevOps, SecOps, and design teams to maintain high standards of performance, security, and reliability.

Following organisational changes at Isabel in the beginning of 2025, our collaboration came to an end.

Since then I have continued working with different clients and projects, which has allowed me to deepen and broaden my expertise across different technology stacks.

I usually work with an AWS infrastructure or serverless services and my main focus areas include:

- CMS-driven marketing sites
- Node.js & JavaScript frameworks (SPA)
- PHP / Laravel applications
- Jamstack / Headless solutions with REST or SOAP API integrations

On the front-end, I work with React, Vue, and more recently Next.js & Nuxt.js (in a full stack setup). On the back-end, I interact with databases such as MongoDB and MySQL using PHP or JavaScript.

From the beginning of this year I have been looking for collaboration opportunities whether with digital agencies, product teams, or companies that need reliable capacity. That's why I'm particularly interested in the job position of Front End Developer currently available at Footlocker: my background, experience in corporate environments, collaborative approach, and problem-solving mindset could be valuable support for your team.

I would be very happy to answer any potential questions regarding my application and in the meantime, thank you for your time.

Kind regards,

Marco Maffei
Full Stack Developer
